PROFESSIONAL SUMMARY

AI & ML undergraduate at Anurag University (expected 2027) with project experience in Python-based recommendation, classification, and data analysis. Uses pandas and scikit-learn for text feature vectorization, cosine similarity, and machine learning workflows. Interested in applying these foundations to Generative AI prototyping, prompt engineering, and AI assistant development.

TECHNICAL SKILLS

Programming: Python, Java (basic), C, SQL

Machine Learning: ML fundamentals, classification, recommendation systems, text vectorization, cosine similarity, model evaluation

Libraries & Tools: pandas, NumPy, scikit-learn, Jupyter Notebook, Git

Generative AI: Generative AI fundamentals, prompt engineering (certifications listed)

Web Development: HTML, CSS, JavaScript, Flask (basic)

PROJECTS

Movie Recommendation System

- Built a content-based recommender in Python, transforming text features and applying cosine similarity to rank movies from user input.

AI/ML Mini Tools

- Created classification models, automation scripts, and data analysis tools using Python, pandas, and scikit-learn; practiced end-to-end ML workflows.

Additional AI Project Repositories

Student Dashboard Website

- Built a responsive dashboard for assignments, GPA, and attendance, with browser local storage to retain user data.

EDUCATION

B.Tech, Computer Science (AI & ML) | Anurag University, Hyderabad | 2023–2027 (expected) | CGPA: 7.05

EXPERIENCE & CERTIFICATIONS

Virtual Internship | Infosys Springboard

Certifications: AI/ML Fundamentals, Generative AI, Prompt Engineering, Python Programming, Java

Activities: Participant in university-level hackathons and coding clubs.
